

Let the Sunshine In

If you're thinking about PVC-U double glazing, why not consider adding a patio door? You may already have an old aluminium patio to replace, in which you will discover your new PVC-U patio beautifully easy to operate for everyone in the home.

If you don't have a patio door at the moment, why not let the sunshine in by installing one? Perhaps you have a window in your kitchen or dining room where the brickwork underneath could be removed, and a beautiful new patio door installed? This will transform the look and feel of your home, and add considerable value too.

The latest in PVC-U design means your new patio doors are highly energy efficient thanks to the inherent insulation of our multi-chamber PVC-U profiles and advanced energy-saving glass technology. So, you save on your heating bills and help reduce harmful emissions.

Security is of paramount importance; and whilst your new patio doors look beautiful, underneath they are designed with security in mind. Frames are reinforced with galvanised steel for strength, while toughened safety glass, advanced locking systems and internal glazing are all standard features.

Naturally, you can choose from a crisp white finish to a range of woodgrain effects, with options including Georgian bar or leaded effects. Whichever patio door you choose, you can rest assured it will be professionally installed to the highest standards.

PVCu Patio Door

Our PVCu Patio door offers you the best characteristic of the materials used from the warmth of PVCu, the rigidity of the many steel reinforced profiles to the aluminium interlocks that give warmth and security.

Description:

A PVCu patio door with steel reinforced sashes, and outer frame stainless steel track, tandem roller for easy sliding.

Finishes:

White, Golden Oak and Rosewood gives you choice of colours.

Locking System:

An anti drill and anti pick cylinder combined with 6 hook bi-directional locking to give you the security you deserve. The keep plate is fixed through the PVCu into steel reinforcing, to give you the best chance of resisting an unwelcome visitor.

Handles:

White, Gold or Chrome to give you an elegant finish.

Features:

Anti-slip threshold inserts are standard.

Beading:

Ovolo beads give you an attractive sight line.
